

INDEX

- Abscissa 454
- Adams, John, C. 481
- Alexander the Great 6
- Algebra review 69, 101, 118, 136, 204, 235, 265
- Analytic geometry 450
- Angle(s)
 - acute 190
 - adjacent 90
 - alternate exterior 249
 - alternate interior 248
 - congruence of 139
 - complementary 251
 - corresponding 249
 - definition of 88
 - definition of degree measure of 391
 - definition of "greater than" and "less than" for 187
 - definition of one degree 391
 - definition of right 146
 - existence of right 184
 - exterior of 92
 - included 149
 - interior of 92
 - measurement of 390
 - notation for indicating 88
 - obtuse 190
 - sides of 88
 - straight 88
 - sum of two 254
 - supplementary 145
 - supplementary and adjacent 89
 - vertex of 88
 - vertical 89
- Apollonius 6
- Arc 375
- Archimedes 8, 128
 - Archimedes' axiom 128
 - Archimedes' integer 128
- Area
 - of a circle 370
 - determined by counting 323
 - as a limit 325
 - of a polyhedron 442
 - of a rectangle 328
 - of a sphere 446
 - of a triangle 334
- Aristotle 5, 479

- Assumptions 73
- Axioms (postulates, assumptions) 72
- Axis(es)
 - of abscissas 454
 - coordinate 454
 - of ordinates 454
- Bell, E. T. 452, 504
- Bisector
 - of an angle 193
 - perpendicular 193
- Bolyai, J. 7, 243
- Circle(s)
 - center of 218
 - central angle of 218
 - chord of 218
 - circumscribing a polygon 348
 - definition of 218
 - definition of area of 370
 - definition of circumference of 363
 - diameter of 218
 - exterior of 218
 - inscribed angle of 218
 - inscribed in a polygon 352
 - interior of 218
 - radius of 218
 - secant of 218
 - tangent to 351
- Circular arc(s)
 - adjacent 382
 - definition of 376
 - definition of degree measure of 391
 - definition of semicircular arcs 376
 - midpoint of 379
 - subtended by a central angle 376
- Commensurable segments 287
- Completeness postulate 131
- Congruence of angles
 - postulate for 139
 - reflexive, symmetric, and transitive properties 142
- Congruence of segments
 - postulates for 105
 - reflexive, symmetric, and transitive properties 106
 - undefined relation 114
- Congruence of triangles
 - angle-side-angle theorem 166
 - definition of 162
 - side-angle-side postulate 148
 - side-angle-side theorem 161
 - side-side-side theorem 174
- Converse of an implication 54
- Coordinate(s)
 - abscissa of a point 458
 - ordinate of a point 458
 - origin of 454
 - of a point in the plane 458
 - of a point on a line 453
- Decagon 257
- Definitions
 - importance of 118
 - in algebra 101, 118
- Degree measure
 - of angles 391
 - of arcs 395
- Descartes, René 450
 - his Discourse on Method 450
 - his Geometry 450
- Diameter 218

- Direction, rays with the same 239
- Distance between points 467
- Division
 - definition in algebra 101
 - of segment into congruent parts 277
- Equation(s)
 - of a circle 473
 - equivalent 466
 - linear 466
- Euclid 8, 20, 209
 - his Elements 6, 20, 208
 - his parallel postulate
- Eudoxus 5, 128, 288
- Figures, relation between figures and geometry 75
- Galileo 479
- Gauss, K. F. 7, 244
- Geometric figure 13
- Geometry
 - analytic 451
 - cartesian 451
 - coordinate 451
 - origin of word 3
 - reasons for study 1
 - of space 424
- Greek letters 39
- Heptagon 257
- Heron's formula 335
- Hexagon 260
- Hilbert, David 7, 107, 208, 264, 505
 - his Foundations of Geometry 505
- Historical notes 6, 221, 243, 288, 380, 450
- Hypotenuse 271
- Hypothesis 50
- Implication 49
- Incommensurable segments 287
- Inequalities
 - for angles 186
 - for numbers 125
 - for segments 111, 133
- Infinite sequences
 - of numbers 358
 - of polygonal paths inscribed in an arc 382
- Infinite sum 125
- Integers 124
- Intersect 74
- Irrational numbers 123
- Isosceles triangle 155
 - base angles of 155
- Jourdain, Philip 505
- Leibniz 7
- Le Verrier 481
- Limit(s)
 - area of rectangle as 325
 - circumference of circle as 363
 - length of circular arc as 380
 - of a sequence 360
- Line(s)
 - abstract character of 14
 - equations of 462
 - existence of parallels to 240, 242
 - parallel 238
 - perpendicular 193
 - perpendicular to a plane 430
 - proof of straightness of 211
 - skew 432
 - straightness of 73
 - transversal of 247
- Lobachevski 7

- Locus 408
 - characterization of theorems
 - on 409
 - cycloid as 414
 - definition of 414
 - hypocycloid as 414
- Logic
 - Aristotelian 60
 - deductive reasoning 50
 - definition of 45
 - drawing conclusions 50
- Mathematics
 - applied 482
 - consistency of 506
 - discovery or invention of 506
 - independent of experiments
 - 479
 - models 481
 - pure 482
 - related to life 506
 - related to truth 506
 - research in 506
 - usefulness of 481
- Measurement
 - of angles in degrees 392
 - of angles in radians 396
 - of an angle inscribed in a circle
 - 400
 - of arc length 380
 - of arcs in degrees 396
 - change of scale in 134
 - of segments 126
 - unit of length for 127
- Midpoint
 - of arc 377
 - formula for coordinates of
 - 470
 - of segment 156
- Newton, Isaac 5
 - his Principia 5
- n-gon 261
- Nonagon 257
- Non-Euclidean geometry 245
- Numbers
 - irrational 123
 - positive integers 122
 - positive rational 122
 - ratio of integers 124
 - real 124
 - repeating decimals 123
 - role in Greek geometry 116
 - terminating decimals 123
- Octagon 265
- Ordinate 454
- Orthocenter 418
- Parallelogram 265
 - altitude of 331
 - base of 331
- Pentagon 260
- Perpendicular 193
- Philosophy,
 - epistemology 476
 - metaphysics 476
 - moral 476
 - political 476
 - religious 476
 - theology 476
- Physics
 - assumptions of 480
 - related to mathematics 480
- Pi
 - approximations for 365
 - calculation of rational
 - approximations 367
 - definition of 364
- Plane(s)

- abstract character of 14
- left half of 457
- lower half of 457
- parallel 434
- perpendicular to a line 432
- right half of 457
- upper half of 457
- Plato 6
- Point(s)
 - abstract character of 18
 - collinear 83
 - of tangency 350
 - sides of on a line 87
- Polygon(s)
 - adjacent sides of 257
 - adjacent vertices of 256
 - apothem of regular 354
 - center of regular 354
 - central angle of regular 354
 - circumscribing a circle 353
 - classification of 261
 - consecutive angles of 261
 - convex 260
 - diagonal of 258
 - equiangular 258
 - equilateral 261
 - inscribed in a circle 347
 - interior and exterior of 259
 - radius of regular 354
 - regular 262
 - similar convex 288
 - simple 258
 - sum of exterior angles 265
 - sum of interior angles 265
- Polygonal cell 437
- Polygonal path
 - definition of 214
 - endpoints of 214
 - inscribed in an arc 380
 - length of 217
 - sides of 256
 - vertices of 214
- Positive axis 452
- Positive direction 452
- Postulate(s) (axioms, assumptions) 72
 - of Archimedes 128
 - of Group I (incidence) 77
 - of Group II (betweenness) 79, 83
 - of Group III (linear congruence) 105, 107
 - of Group IV (angle congruence) 139, 142
 - necessity for 116
 - parallel 242
- Proof 48
 - in algebra 69
 - independent of geometric figures 73
 - related to implication 57
 - relation of definitions to 112
 - techniques of 61
- Properties, distinguished from relations 146
- Proportion(al) 281
 - mean 305
 - sets of numbers 284
 - sets of segments 284
- Ptolemy 6
- Pythagoras 3
- Pythagorean theorem 304
 - area proof of 339
 - converse of 308
- Quadrants 456
- Quadrilateral 262

- Radian measure 397
- Ratio 281
 - of integers 124
 - of segments 284
- Rays 88
 - with same direction 239
- Rectangle 265
 - area of 323
 - existence of 267
- Relations 148
- Rhombus 265
