

INDEX

- Abscissa 388
- Adams, John, C. 413
- Alexander the Great 6
- Algebra review 59, 89, 104, 119, 168, 195, 222
- Analytic geometry 384
- Angle(s)
 - acute 160
 - adjacent 79
 - alternate exterior 208
 - alternate interior 208
 - congruence of 121
 - complementary 210
 - corresponding 208
 - definition of 77
 - definition of degree measure of 331
 - definition of "greater than" and "less than" for 156
 - definition of one degree 331
 - definition of right 127
 - existence of right 152
 - exterior of 81
 - included 129
 - interior of 81
 - measurement of 330
 - notation for indicating 77
 - obtuse 160
 - sides of 77
 - straight 77
 - sum of two 212
 - supplementary 126
 - supplementary and adjacent 78
 - vertex of 77
 - vertical 78
- Apollonius 6
- Arc 317
- Archimedes 8, 111
 - Archimedes' axiom 112
 - Archimedes' integer 111
- Area
 - of a circle 313
 - determined by counting 273
 - as a limit 275
 - of a polyhedron 375
 - of a rectangle 276
 - of a sphere 380
 - of a triangle 280
- Aristotle 5, 411

- Assumptions 63
- Axioms (postulates, assumptions) 62
- Axis(es)
 - of abscissas 388
 - coordinate 388
 - of ordinates 388
- Bell, E. T. 386, 436
- Bisector
 - of an angle 128
 - perpendicular 160
- Bolyai, J. 7, 202
- Circle(s)
 - center of 180
 - central angle of 181
 - chord of 181
 - circumscribing a polygon 292
 - definition of 180
 - definition of area of 313
 - definition of circumference of 306
 - diameter of 180
 - exterior of 180
 - inscribed angle of 181
 - inscribed in a polygon 296
 - interior of 180
 - radius of 180
 - secant of 181
 - tangent to 294
- Circular arc(s)
 - adjacent 323
 - definition of 318
 - definition of degree measure of 331
 - definition of semicircular arcs 318
 - midpoint of 320
 - subtended by a central angle 318
- Commensurable segments 242
- Completeness postulate 114
- Congruence of angles
 - postulate for 121
 - reflexive, symmetric, and transitive properties 123
- Congruence of segments
 - postulates for 93
 - reflexive, symmetric, and transitive properties 94
 - undefined relation 98
- Congruence of triangles
 - angle-side-angle theorem 143
 - definition of 135
 - side-angle-side postulate 128
 - side-angle-side theorem 136
 - side-side-side theorem 144
- Converse of an implication 44
- Coordinate(s)
 - abscissa of a point 392
 - ordinate of a point 392
 - origin of 388
 - of a point in the plane 392
 - of a point on a line 386
- Decagon 216
- Definitions
 - importance of 103
 - in algebra 89, 104
- Degree measure
 - of angles 331
 - of arcs 334
- Descartes, René 384
 - his Discourse on Method 384
 - his Geometry 384
- Diameter 180

- Direction, rays with the same 199
- Distance between points 401
- Division
 - definition in algebra 89
 - of segment into congruent parts 235
- Equation(s)
 - of a circle 406
 - equivalent 399
 - linear 399
- Euclid 7, 14, 173
 - his Elements 6, 14, 172
 - his parallel postulate
- Eudoxus 5, 112, 243
- Figures, relation between figures and geometry 65
- Galileo 411
- Gauss, K. F. 7, 203
- Geometric figure 11
- Geometry
 - analytic 385
 - cartesian 385
 - coordinate 385
 - origin of word 3
 - reasons for study 1
 - of space 360
- Greek letters 31
- Heptagon 216
- Heron's formula 283
- Hexagon 218
- Hilbert, David 7, 95, 172, 221, 437
 - his Foundations of Geometry 437
- Historical notes 6, 183, 202, 243, 321, 384
- Hypotenuse 229
- Hypothesis 42
- Implication 41
- Incommensurable segments 242
- Inequalities
 - for angles 155
 - for numbers 109
 - for segments 97, 116
- Infinite sequences
 - of numbers 302
 - of polygonal paths inscribed in an arc 323
- Infinite sum 108
- Integers 106
- Intersect 64
- Irrational numbers 107
- Isosceles triangle 132
 - base angles of 132
- Jourdain, Philip 437
- Leibniz 7
- Le Verrier 413
- Limit(s)
 - area of rectangle as 275
 - circumference of circle as 306
 - length of circular arc as 321
 - of a sequence 303
- Line(s)
 - abstract character of 14
 - equations of 394
 - existence of parallels to 199
 - parallel 198
 - perpendicular 158
 - perpendicular to a plane 366
 - proof of straightness of 177
 - skew 368
 - straightness of 63
 - transversal of 207
- Lobachevski 7
- Locus 346

- characterization of theorems
 - on 347
- cycloid as 351
- definition of 351
- hypocycloid as 351
- Logic
 - Aristotelian 51
 - deductive reasoning 42
 - definition of 37
 - drawing conclusions 42
- Mathematics
 - applied 414
 - consistency of 438
 - discovery or invention of 438
 - independent of experiments 411
 - models 413
 - pure 414
 - related to life 438
 - related to truth 438
 - research in 438
 - usefulness of 413
- Measurement
 - of angles in degrees 330
 - of angles in radians 336
 - of an angle inscribed in a circle 338
 - of arc length 322
 - of arcs in degrees 334
 - change of scale in 118
 - of segments 110
 - unit of length for 110
- Midpoint
 - of arc 319
 - formula for coordinates of 403
 - of segment 133
- Newton, Isaac 5
- his Principia 5
- n-gon 219
- Nonagon 216
- Non-Euclidean geometry 205
- Numbers
 - irrational 107
 - positive integers 106
 - positive rational 106
 - ratio of integers 106
 - real 108
 - repeating decimals 107
 - role in Greek geometry 102
 - terminating decimals 107
- Octagon 222
- Ordinate 388
- Orthocenter 355
- Parallelogram 223
 - altitude of 278
 - base of 279
- Pentagon 218
- Perpendicular 160
- Philosophy,
 - epistemology 408
 - metaphysics 408
 - moral 408
 - political 408
 - religious 408
 - theology 408
- Physics
 - assumptions of 412
 - related to mathematics 412
- Pi
 - approximations for 308
 - calculation of rational approximations 310
 - definition of 308
- Plane(s)
 - abstract character of 14

- left half of 391
- lower half of 391
- parallel 369
- perpendicular to a line 367
- right half of 391
- upper half of 391
- Plato 6
- Point(s)
 - abstract character of 14
 - collinear 72
 - of tangency 294
 - sides of on a line 76
- Polygon(s)
 - adjacent sides of 215
 - adjacent vertices of 215
 - apothem of regular 298
 - center of regular 298
 - central angle of regular 298
 - circumscribing a circle 297
 - classification of 219
 - consecutive angles of 219
 - convex 218
 - diagonal of 219
 - equiangular 217
 - equilateral 219
 - inscribed in a circle 291
 - interior and exterior of 218
 - radius of regular 298
 - regular 218
 - similar convex 244
 - simple 216
 - sum of exterior angles 218
 - sum of interior angles 222
- Polygonal cell 373
- Polygonal path
 - definition of 178
 - endpoints of 178
 - inscribed in an arc 322
 - length of 179
 - sides of 215
 - vertices of 178
- Positive axis 386
- Positive direction 386
- Postulate(s) (axioms, assumptions) 62
 - of Archimedes 111
 - of Group I (incidence) 67
 - of Group II (betweenness) 69
 - of Group III (linear congruence) 93, 95
 - of Group IV (angle congruence) 121, 123
 - necessity for 102
 - parallel 202
- Proof 39
 - in algebra 59
 - independent of geometric figures 63
 - related to implication 48
 - relation of definitions to 99
 - techniques of 51
